## Safe and Effective - For use in all areas of emergency services and healthcare professionals

Alcohol commonly found in other sanitiser wipes destroys your skin's protective surface. Its prolonged use can also damage hard surfaces and expensive equipment.

De-Wipe Alcohol Free Sanitiser Wipes contain non-alcohol based broad-range antimicrobials. These key ingredients kill tough bacteria and viruses in seconds without soap and water. They're kind to your skin's natural defences and won't deteriorate hard surfaces.

De-Wipe Alcohol Free Sanitiser Wipes are also scientifically proven to eliminate the risk of infection from bloodborne and waterborne pathogens.
