De-Wipe

Canine Care: De-Wipe Dog Shampoo & Conditioner

Developed for fire investigation dogs, De-Wipe Canine Care Shampoo and Conditioner help remove nasty fireground contaminants while gently caring for the skin and coat.

The Importance of Protecting Fire Investigation Dogs

Fire investigation dogs are exposed to hazardous fireground contaminants just like their handlers, often more so, yet without the protection of PPE, making effective post-incident care and decontamination essential to their health and wellbeing.

Martin Lown at Phoenix Forensic Service Provider/FireWise UK Learning Academy Says...

"I've been really impressed with the new De-Wipe dog shampoo. It effectively removes harmful fireground contaminants from the skin and coat after operations, protecting our dogs is just as important as protecting ourselves. It smells great and leaves Hygge with a fresh 'puppy smell'. A product I'm very happy to use and would highly recommend for fire investigation dogs."
